Block Level Agromet Advisories

Tel: +91-1792-252706 ; Telefax: +91-1792-252279; e-mails: jangra_ms@live.com

Year : 1 Bulletin No: 4 Period: 14 -17 July Date: 13-07-2018

Dharmpur, Kandaghat, Kunihar & Nalagah Block

Weather Forecast for next 5 days

During the next five days weather will remain cloudy and variable with light to moderate rainfall in all four blocks. Day & night temperature will decrease @ 1-2 degree. Moderate wind speed will be 5-13 kmph from South-East direction. Relative humidity will fluctuate between 34-94%

General Advisory

As the weather will remain variable. So, do the cultural practices as advised under Crop advisory.

Crop Advisory

Prepare Water Harvesting Tanks- Small temporary water tanks can be prepared at low cost using black sheet of mulch. Use this tank water in drip irrigation system for best use of rainwater.

Vegetables:- Tomato, Chillies, Brinjal : Stage: Vegetative Growth/ Flowering/ Fruit development

Protection of Tomato fruit from Buckeye Rot disease:-

Due to increase in intensity of rainfall. Black spot disease appears and spread. for its protection:-

1. Check proper staking in tomato plantation.
2. Remove the leaves of near the surface.
3. Apply Rhodomil-D(0.25%) @ 2.5 Gram/ Litre water and spray at 8-10 days interval.

Fruit Crop:- Stone Fruits, Strawberry, Green Almond, Apple Stage: Flowering/ Fruit development

Protection of Apple Scab, Alternria blight, core Rot diseases - Spray Mencojob + Carbendazim (500+100gram) or Propeneb (600grm) or Dodin (150gm) in 200 litre of water .

Protection of leaf spot disease in strawberry spray hexaconajol/ carbondijim 100 gram in 200 litre water

Animals Husbandary:-

Sowing of Makka, Jawar and Lobia can be done in this month for animals as fodder.
